

CURRICULUM VITAE

Professor AbuBakr S. Bahaj

AbuBakr S Bahaj is Professor of Sustainable Energy at the University of Southampton.

Over the last 20 years, Prof Bahaj has established the energy theme within the University and directed his Sustainable Energy Research Group (www.energy.soton.ac.uk, SERG), which is now considered to be one of the UK's leading university-based research groups in renewable energy and energy in buildings. He initiated and managed research in ocean energy conversion (resources, technologies and impacts), photovoltaics, energy in buildings and impacts of climate change on the built environment in the University. This work has resulted in over 230 articles published in academic refereed journals and conference series of international standing.

Prof Bahaj also heads the 50 strong Energy and Climate Change Division (ECCD) within the highly rated School of Civil Engineering and the Environment (www.civil.soton.ac.uk/research/divisions/divlist.asp?ResearchGroupID=1) (2nd in the UK, Research Assessment Exercise in 2008, with 80% of our research was judged to be either "World Leading" or "Internationally Excellent").

The aims of the Division and SERG are to promote and execute fundamental and applied research and pre-industrial development in the areas of energy resources, technologies, energy efficiency and the impact of climate change.
